

LIFewareSM System

5/9/12

The LIFeware[®] Advantage

The LIFewareSM System is an Internet-based outcomes tracking system created specifically for the outpatient market. It is for those who value the importance of measuring functional status outcomes to:

- Monitor treatment effectiveness and efficiency
- Evaluate clinician performance
- Substantiate program quality
- Meet Joint Commission and CARF accreditation requirements
- Justify reimbursement
- Market to physicians or third party payers

The LIFewareSM System is used in a variety of settings, including:

- Outpatient rehabilitation
- Adult day healthcare centers
- Private practices
- Pain clinics
- Other outpatient settings

LIFewareSM System Input: Condition-Specific Assessments

The LIFewareSM System uses assessments and measures to track patient and program outcomes. Patients and clinicians check boxes to respond to questions on a broad range of standardized assessment forms. Data is entered into the LIFewareSM System through a secured Internet connection. Entering data via the Internet provides the benefit of immediate report analysis, which makes the LIFewareSM System one of the most cost-effective outpatient outcomes tracking systems available.

LIFewareSM System Output: LIFeware[®] Reports

Individual Patient Reports

Several types of individual patient reports provide longitudinal tracking and snapshots of the patient's progress.

Custom Forms

The custom form feature allows the user to create customized forms with the measures that are used most frequently, giving the flexibility needed when reporting on a condition or problem. For example, you can choose to use just the Shoulder Pain and Shoulder Function measures without using the ROM measure, making your form more conducive to the data you track.

Quarterly Program Management Reports

These reports help monitor program efficiencies, therapist outcomes, and provide comparative benchmark data to other programs.

- Demographic Report
- Summary Report
- Trend Report
- Detail Report

Features and Benefits

LIFEWareSM System

| Features | Benefits |
|---|--|
| Self-administered questionnaires | Patients complete forms in your waiting room Instant patient feedback |
| Internet-based system | Fast, real-time reporting Saves time and money |
| Online data entry | Clinician or patient data entry options HL7 [®] interface capability |
| Powerful visual patient profiles | Display functional strengths and challenges Help pinpoint specific treatment needs Excellent resource for patient conferences |
| Quarterly national benchmark reports | Summarize outcomes of groups of patients Allow evaluation with similar facilities throughout the U.S. |
| More than 600,000 patient assessments | Large national database permits reliable statistical comparisons |
| Custom comparison reporting with analysis of sites and clinicians | Measures program and therapist efficiencies |
| Robust reporting options | Reduce manual tracking of quality indicators and patient feedback Assist with regulatory, Joint Commission, and CARF accreditation requirements |
| Powerful graphic reports | Effective marketing tool to referral sources, third-party payers, and consumers |
| Low annual subscription fee | Affordable outcomes solution |
| Customizable forms | Allow you to pick and choose measures of importance |

Comprehensive

The LIFEWareSM System contains assessment instruments and measures for evaluating patients across seven core functional domains:

- Physical Function
- Cognitive Function
- Mood or Affect
- Pain
- Social Interaction
- Role Participation
- Satisfaction with Treatment

Wide-ranging application

The LIFEWareSM System tracks outcomes for a diverse range of patient populations, including those with the following impairments:

- Musculoskeletal conditions
- Neurological conditions
- Memory conditions
- Cardiopulmonary conditions
- Pain conditions
- Joint-specific conditions

Cost-effective

- Low annual subscription fee
- No extra charge for patient reports
- No extra charge for standard reports (site vs. nation)
- E-mail patient outcomes reports directly to your referral sites
- No software to load or maintain (UDSMR automatically upgrades and manages the LIFEWare[®] software via the Internet)
- Subscription fee includes technical assistance, training, and support

Meaningful Value

- Supports medical necessity documentation compliance
- Helps substantiate ongoing patient treatment with payers
- Includes measures to support compliance with the Physician Quality Reporting Initiative (PQRI)
- Provides a reliable and economical outcomes management system for your outpatient program
