

UDS-PROi[®] HL7[®] Interfaces

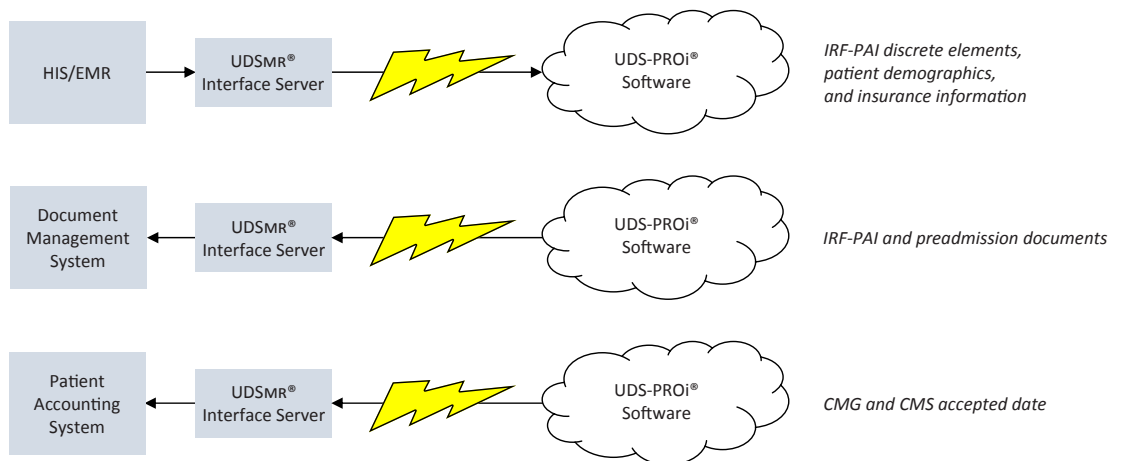

Many inpatient rehabilitation facilities are faced with the challenge of ensuring data accuracy between multiple hospital systems. UDSMR's affordable HL7[®] integration options help ensure consistency between applications. Our UDS-PROi[®] HL7[®] interfaces can:

1. Automatically transfer patient records to the UDS-PROi[®] software's case listing when a patient is admitted to rehabilitation from your registration system.
2. Transfer FIM[®] assessments, therapy information, and quality indicators from your clinical documentation system to the UDS-PROi[®] software.
3. Send the IRF-PAI and preadmission screen from the UDS-PROi[®] software to your document management system so these important documents can be integrated into the patient's medical record.
4. Send the CMG and CMS accepted date from the UDS-PROi[®] software to your billing system.

Benefits

We offer four interfaces, all of which offer a variety of benefits to rehabilitation facilities.

- **Reduced data entry:** Saves on people time by providing a single point of data entry.
- **Improved data integrity:** Data entered at admission or into a clinical documentation system does not have to be entered a second time, thus reducing data entry errors.
- **Real-time data processing:** Cases are automatically created in the UDS-PROi[®] software once the admission process is complete, and related information and IRF-PAI documentation are updated as soon as they become available.
- **Reduction in coding and billing errors:** Key billing data stays consistent with clinical evaluations and documentation.
- **Reduction in paper and ink costs:** Costs and time incurred by manually scanning IRF-PAIs and preadmission screens are eliminated.

All transactions happen in real time!

A cost-effective solution

UDSMR's four UDS-PROi[®] HL7[®] software interfaces are available for a one-time license fee of \$3,495, regardless of the number of interfaces you decide to implement. They can be purchased one at a time or all at once, depending on your needs, and are available for a one-time cost that covers setup, deployment, and testing. This cost is typically \$14,500 for all four interfaces, which is well below comparable offerings from other HIS vendors, plus a monthly fee of \$250 for ongoing support.

If you or your facility's integration team has any questions about UDSMR's UDS-PROi[®] HL7[®] interfaces, contact Joan Hagerty at 716-817-7814 or HL7@udsmr.org.
